

Our Service

Pre-Sales Service

- * Inquiry and consulting support.
- * Sample testing support.
- * View our Factory.

After-Sales Service

- * Training how to install the machine, training how to use the machine.
- * Engineers available to service machinery overseas.

Our Company

Factory is located in the Lianyungang free economic zone, in 460km from Shanghai city. This selection of the production site is quite grounded and logical, at present only China is able to grant good value for money and great opportunities for production development. Locating of the factory close to the seaport ensures optimization of the shipment process.

The executive management of the factory was able to get together the top brains of the industry in China: designers, engineers and trained workers being qualified experts, masters of their craft, which has ISO9001:2008 and CE certificates.

The factory's manufacturing folk are focusing on each client's request absorbedly. Engineers are unceasing in the search for the perfection of the product and satisfaction of the customer's requirements. The quality control on the factory is executed by Chinese and Russian experts.

We regularly practice exchange of experience between our engineers, designers of equipment and technical specialists who are operating the FORWARD drill rigs. It helps us to make constantly improvements of the equipment and guarantee up-date quality and functional level of our products

At the moment the factory is manufacturing 5 main series of the drilling equipment:

Multifunction Top Drive Drill Rigs

Coring Drill Rigs

Horizontal Directional Drill Rigs

Water Well Drilling Rig.

Slanted Workover Drill Rig

The company pays a lot of attention to the technical innovations and products development. We have design and engineering teams in Germany, Australia, and China.

At the moment the factory is working on some new models and types of the drilling equipment.
